

# Project Design Phase I

## Solution Architecture

Date	1 October 2022
Team ID	PNT2022TMID47303
Project Name	University Admit Eligibility Predictor

### Solution Architecture:

1. Application developer builds a python based app and deploys it.
2. Students can enter the data through a web based application.
3. When Student submits data can be trained in the background and get back the result.
4. Based on the result, the quotes will be sent to the user interface.
5. This result is displayed to the student.
